Correction, Per RIC, ASPECT will continue flying daily until RIC calls off the aerial ops.

Apologies.

Adam,

Looks like the original estimate of four days will be accurate. If today is the last day they collect some data we should have it covered.

Tim,

I have no additions or comments for these; only a reminder that we'll continue this op daily until called off.

I appreciate all the help this week.

Adam and Kellon,

See the attached files for the SOW and IGCE for the ASPECT deployment to Deer Park for the ITC tank fires. This is based on four days of flights including last night. If you think this will go longer give me a call and we can discuss how to modify the IGCE appropriately.

That works just fine Adam. It will be in the ball park and I will go with that.

Mgmt is asking to plan for utilizing the aspect mid day Today thru wed. So, a total of four events. As the incident is progressing, I don't foresee cutting that short, but then it could happen.

Apologies for not having a more firm estimate.

Gentlemen,
I do not currently have an estimate of the ASPECT deployment costs for this latest response. I thought we were done yesterday and it would have been pretty easy. The discussion now is for a longer term monitoring mission. If someone would give me a ball park estimate of the number of days the service is needed I will pull something

together to help get the PR ball rolling.
